

Loading and uploading the data into Cognos Platform:

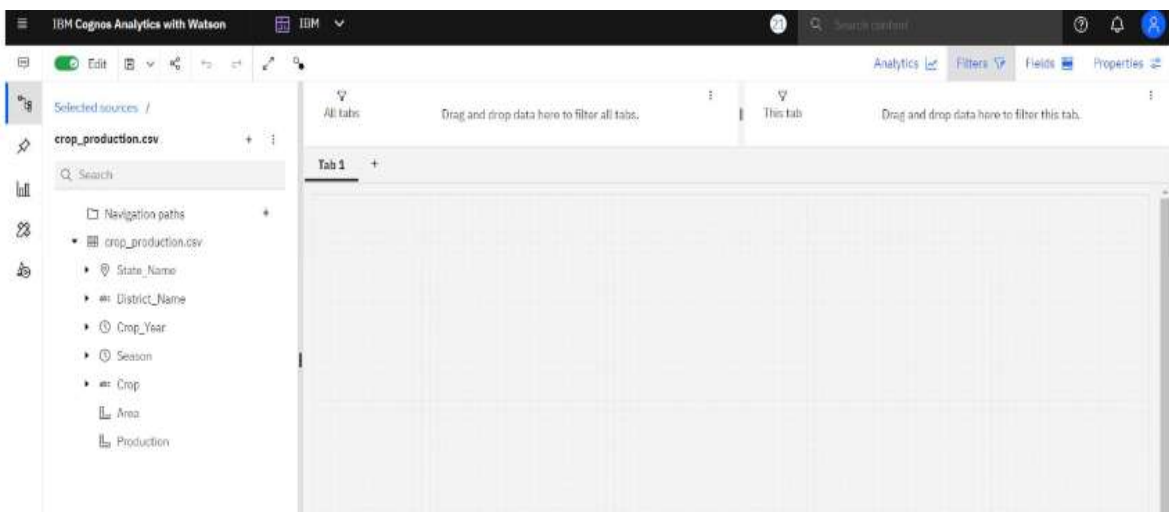

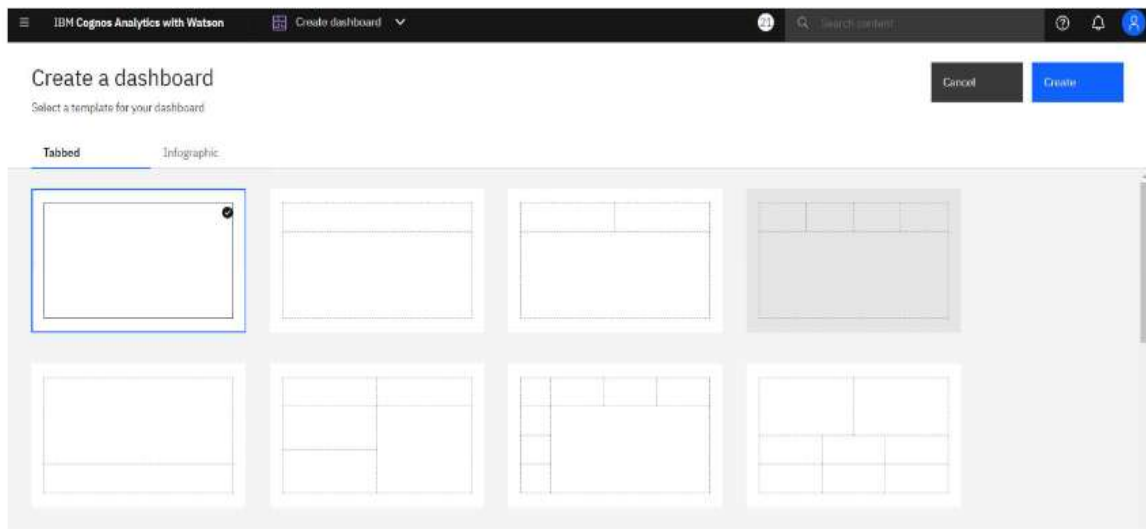

The screenshot displays the IBM Cognos Analytics with Watson web application interface. The top navigation bar includes the IBM logo, the text "IBM Cognos Analytics with Watson", a search bar, and user profile icons. The main header area features the "Watson." logo and a message: "You can get started right away by taking a look at our introduction video, product tour and Getting Started tab." Below this are two buttons: "Watch video" and "Take a product tour".

The "Quick launch" section contains four tiles:

- Upload data**: Upload or drag and drop spreadsheets, csv files, and other data sources.
- Prepare data**: Use data modules to clean and connect data from multiple resources.
- Exploration**: Quickly find unbiased answers by identifying trends in your data with data explorer.
- Present data**: Create sophisticated, multi-page, multi-query dashboards, reports, or stories.

Below the quick launch section, a browser window shows the URL "ap2.ca.analytics.ibm.com/bi/perspective-home". The browser's address bar and tabs are visible. The application interface shows a "Recent" tab with a list of files. The first file is "crop_production.csv", which was "Last Accessed" on "26/09/2022, 6:24 AM". A "CSV" icon and an upload arrow are visible next to the file name.

Creating the dashboard:

The dataset is successfully loaded into the cognos platform.
